

SIGN & LIGHTING BUCKET TRUCKS

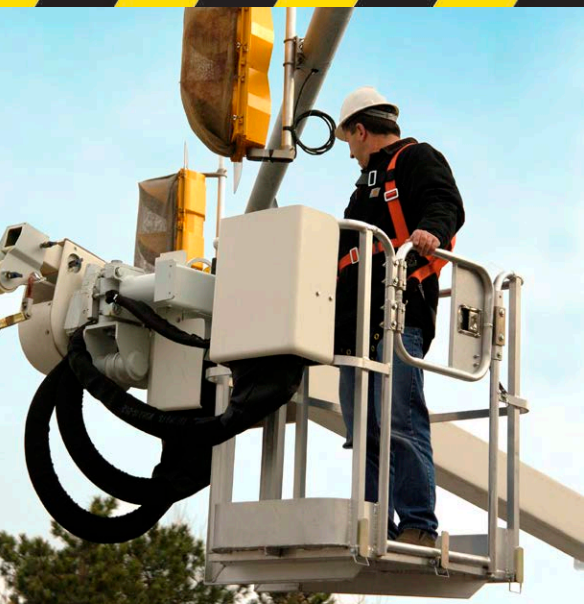

To ensure that Dur-A-Lift helps our customers get the job done right, we're committed to the idea that customization comes standard. Instead of a one size fits all approach, we build lifts made just for you. Check out these bucket trucks that are perfect for anyone in the sign and lighting industries.

SIGN AND LIGHTING BUILD FEATURES AND OPTIONS

Aluminum or fiberglass basket | Ground level access to basket | 180 degree basket rotator
Tons of storage compartments available | Sign holding brackets
Optional jib and winch | One or two man platforms | Single-hand control system

DUR-A-LIFT®

Dur-A-Lift's DPM2, DPM, DTAX and DTA series lifts are all great options for anyone in the sign and lighting industries. They are available with fiberglass or open construction aluminum baskets. A negative boom angle allows you to access the baskets from ground level. And our single-hand control allows you to easily maneuver the basket with one hand while working with the other.

The 180 degree rotating basket allows you to get more places once the boom has been positioned.

Sign holding brackets are located on the bottom of the basket for convenient sign lifting.

Lots of custom storage options available including compartments made for 8' or 10' bulbs.
